How to use Weathering Effects

Art. 73.828

Wet Effects

An all purpose weathering product, formulated to reproduce the humid aspect on models and dioramas. Can be combined with other weathering effects to increase the impression of humidity and wet weather.

By Özgür Güner

- 1 This- ready- to- use product is ideal for simulating glossy wet surfaces or for enhancing the look of wet mud.
- 2 You need an old fine brush to add Wet Effects to the places that need a glossy wet look.
- 3 You can use Wet Effects randomly over the model to create more eye- catching details.

- 4 Or you can use it on the tracks to add more realism. Just apply it on the middle of the track surface- where it would be on real vehicles. Wet effects will retain the glossy look once dry.
