Crushed Grass

Crushed Grass contains traces of vegetation and provides a perfect image of grass sticking to the wheels and tracks of the vehicle, and of grass and plants crushed and flattened by the passage of heavy armor, a very realistic detail for models, vignettes or dioramas.

By Chema Cabrero

- 1 This product is specially designed to reproduce the appearance of crushed grass on the tracks of a tank or the wheels of a vehicle, civilian or military use.

- 2 Its texture and density facilitate its application on the model or the base, using brushes or appropriate tools.

- 3 In this case we will apply the product on the tracks of a Panther, suggesting their pass over a wet prairie or grass zone.

- 4 The fresh and wet grass crushed by the vehicle weight and movement are accurately reproduced.

- 5 We can apply the product in several layers as we like. Also you can depict crushed grass splashes blowing air from the airbrush on a brush charged with the mixture.

- 6 The texture and size of grass are in proportion to the models and you can dilute or blend them using water or Vallejo Thinner.
