# HD MODELS

## **Passion and Technology, are the ingredients that gave birth to the HD Models Project (Highly Detailed Models)**

Years of Passion for modeling have merged with 3D Technology, and new frontiers have opened up in the world of scale reproduction, paving the way for Modeling 2.0. We have no limits in offering in any scale accessories, figurines, busts and anything else, both of our own production and on commission.

We perform accurate historical-uniformological research, kits are designed to maintain accurate historical fidelity, optimizing details for printing even in larger scales. We have printed our models even in 1/6 and 1/4 scale.

We model subjects with highly detailed details, for example, grates and grilles or special textures in the right thickness or relief. Compared to a photogravure, the part is slightly more expensive but three-dimensional and rich in detail.

We make 3D scans

We print the subjects with professional 3D printers, the masters are 3D printed at very high resolution, later they are reprinted in resin.

We carry out 3D modeling and 3D printing services at customers' specific request.

Our products are modeled in 1/1 scale, so they can be scaled as desired. This allows us to produce custom orders. For example: a 1/35 scale fountain can also be printed in 54mm, 75mm, 90mm to be proportioned to a figurine.

We are always looking for new ideas to develop in order to expand our catalog and provide customers with whatever they may need.

Browse the catalog and discover all the new products that have joined our "historical" products. You will find many interesting items, specific to different categories, vehicles, dioramas and figurines. If you have any ideas or think we need some ideas for new items please feel free to contact us. We are modelers who create dreams for modelers.

**HD Models, (Highly Detailed Models)**
